

Rechne bis zur 10 - und dann weiter!

$$8 + \begin{array}{c} 5 \\ \diagup \quad \diagdown \end{array} = \square$$

$$8 + \boxed{2} + \boxed{3} = \square$$

$$7 + \begin{array}{c} 8 \\ \diagup \quad \diagdown \end{array} = \square$$

$$7 + \boxed{3} + \boxed{5} = \square$$

$$3 + \begin{array}{c} 9 \\ \diagup \quad \diagdown \end{array} = \square$$

$$3 + \boxed{7} + \boxed{2} = \square$$

$$5 + \begin{array}{c} 7 \\ \diagup \quad \diagdown \end{array} = \square$$

$$5 + \boxed{5} + \boxed{2} = \square$$

$$12 - \begin{array}{c} 7 \\ \diagup \quad \diagdown \end{array} = \square$$

$$12 - \boxed{2} - \boxed{5} = \square$$

$$15 - \begin{array}{c} 6 \\ \diagup \quad \diagdown \end{array} = \square$$

$$15 - \boxed{5} - \boxed{1} = \square$$

$$13 - \begin{array}{c} 8 \\ \diagup \quad \diagdown \end{array} = \square$$

$$13 - \boxed{3} - \boxed{5} = \square$$

$$18 - \begin{array}{c} 9 \\ \diagup \quad \diagdown \end{array} = \square$$

$$18 - \boxed{8} - \boxed{1} = \square$$
